# frequently asked questions

## Why don't you add auto refactoring?

No. Listen.

Stop trying to go faster; start trying to go *slower*.

Don't think about finishing; think about improving.

Think about practising as a team.

That's what cyber-dojo is built for.

# Technical challenges

# Declivities, diversions, and defects

Randonneurs suivant  
le GR7 Chemin de  
Saint-Guilhem-le-Désert :  
! Passages sportifs et délicats (forte pente, pierres)  
non praticable en VTT et à cheval, variante possible  
par la route pour rejoindre les belvédères  
de Blandas (Prudence) !

Hiker following GR7 Chemin de  
Saint-Guilhem-le-Désert:  
Sports and delicate passages (strong slope, fallen rocks)  
impracticable to mountain-bikers and horse riders.  
possible variant by the road to join  
Blandas lookout points (Caution!!)

# Deployment

# Reflect

What would you like to know?

# Learning is the constraint.

*“Ignorance is the single biggest  
impediment to throughput”*

- Ignorance is multivariate
- Discovery is non-linear and disjoint

<https://dannorth.net/2010/08/30/introducing-deliberate-discovery/>

One thing that you learnt at the conference that you are going to try when you get back to work.
